

International Academy of Veterinary Chiropractic:

IAVC Essentials of Veterinary Chiropractic Course 2026

**Practical sessions to be held in Sittensen, Northern Germany,
March to September, 2026 Course Outline - Preliminary dates**

Course start on-line: upon full registration: Course participants can begin immediately learning important veterinary chiropractic theory using the IAVC online learning platform. This allows students to learn from home at their own pace and convenience, the knowledge and background information which will optimize the learning experience during the in-person practical sessions. The combined use of learning platform theory and in-person practical hands-on sessions form an ideal framework, developing the participant's knowledge and skills throughout the duration of the course.

Sacropelvic/Thoracolumbar Practical Session, March 11th – 15th, 2026 (Wednesday to Sunday):

Comprehensive practical sessions with dogs and horses including safety and handling of the animals, and an introduction to the quadruped chiropractic adjustment. The focus is on motion palpation, hand and body positioning, and treatment techniques of the quadruped sacropelvic and Thoracolumbar region.

Cervical Practical Session: April 24th - 26th, 2026 (Friday to Sunday):

Sacropelvic and Thoracolumbar assessment and treatment techniques will be reviewed. Comprehensive practical sessions with dogs and horses focusing on, hand and body positioning, the chiropractic adjustment and treatment techniques as well as motion palpation of the quadruped cervical spine.

Extremities Practical Session, June 18th – 21st, 2026 (Thursday to Sunday):

Cervical assessment and treatment techniques will be reviewed. Comprehensive practical sessions with dogs and horses focusing on motion palpation, hand and body positioning, the chiropractic adjustment and treatment techniques of the quadruped extremities.

Veterinary Chiropractic Integration – Practical Session, September 4th – 6th, 2026 (Friday to Sunday):

A review of all animal chiropractic assessment and treatment techniques. Comprehensive practical sessions with dogs and horses focusing on case management and treatment of the quadruped, as well as a final practical exam.

This remains a tentative schedule at this time, so please do not book travel or accommodation arrangements which are not refundable. Contact us directly for confirmation of the course proceeding as planned. Please feel free to share this information with your colleagues who may be interested.

About the IAVC Program:

The International Academy of Veterinary Chiropractic has been leading the education and growth of animal chiropractic in Europe for over 20 years, teaching in both Germany and England and further internationally. This course offers both veterinarians and chiropractors and students of both professions an opportunity to learn and enjoy a new and exciting inter-disciplinary qualification directly related to their profession which will expand their area of expertise during their entire careers.
